Sliding doors...  
Timeless beauty.

# Sliding Doors

## Insulated Frame

Sunrise's sliding door is insulated with our exclusive urethane insulating core, providing greater thermal efficiency than PVC and wood doors.

## Welcome to my world.

Sunrise Windows sliding doors are the perfect complement to your home's individuality and the design décor you're creating. It's more than an entrance, it's a statement of who you are, and how you want the world to enter and exit.

Dependable security, high durability and easy operation are just a part of the inside story on how Sunrise Windows has transformed a good idea into a great sliding door for every home style.

## FiberCore+Plus

To provide you even greater efficiency and structural integrity, Sunrise Sliding doors feature our exclusive FiberCore+Plus™ construction. This pultruded fiberglass structural core is constructed like an I-beam, giving you the ultimate in frame strength. Coupled with a surrounding layer of UltraCore+Plus™, our exclusive polyurethane insulation, it is a door system guaranteed to perform for a lifetime.

No more feeling like you're forcing a sliding door to behave the way it should: Sunrise sliding doors were designed with a clash-free 30° compression interlock for easy, struggle-free operation and better prevention of air infiltration.

Twin tandem over-size rollers ensure a door that slides easily.

Every Sunrise door incorporates a concealed three-point locking system, which is recessed in the door panel. Three locks simultaneously engage with the door jamb when the door is closed and locked.

## SLIDING DOOR FEATURES

- ▶ **Polyurethane insulation** for superior energy efficiency
- ▶ **Three-point locking system** provides greater security ▲
- ▶ **Optional ventilation/dead bolt foot-lock** available
- ▶ **Exclusive full-length Interlock** for easy, unhampered operation
- ▶ **Quad seal weather-stripping** offers double protection over the industry standard
- ▶ **Top hung screen** provides smooth trouble-free operation with no hang-ups ◀

While most patio door screens are difficult to slide, we've designed our screen just like a sliding closet door. It's "top-hung" to ensure smooth operation year after year. We also included an easy-to-use thumb-turn to help keep the screen closed.

The Golden Oak interior Sliding door above features an Antique Brass handleset, and woodgrain contour grids between the panes of tempered safety glass.

## Choose from five spectacular handleset finishes.

Brushed Nickel (Standard) Forever Finish Brass (Standard) Oil-Rubbed Bronze White Antique Brass

Sunrise sliding doors are also available in configurations up to twelve feet wide, where the center panel slides.

SunBlinds™ are the blinds you never clean! These adjustable mini blinds are sealed between the panes of glass, offering less maintenance with style.

Magnetic operator and cord is used on Lift and Tilt SunBlinds.
