

Endless Shapes For Any Configuration

Shower Pan And Curb Detail Options

Modular Shower System

Showers are supplied in split panels for ease of installation. This shower installs in just a few hours.

Ready-4-Tile Shower Pan and Wall Board components are manufactured by Wedi Corp. Approvals: ICC, ASTM + ANSI, UBC, TCNA, & NTCA

Frequently Asked Questions

Q: I know I want a glass block shower, but how do I get started?

A: Call or email our knowledgeable staff with your questions, or visit our website www.scartglassblock.com. It's loaded with information including completed showers, block patterns, and our showroom location. 3D computer-aided design service is also available.

Q: How large of an area do I need for a doorless shower?

A: 5' x 3' is adequate for a walk-in, doorless glass block shower. A rule of thumb is to locate the entrance 3'-4' from the showerhead.

Q: What material do you recommend for the shower pan and wall panels?

A: Our Ready-4-Tile™ pan and wall systems use waterproof material to create a guaranteed waterproof shower environment. The core consists of 100% waterproof extruded Polystyrene throughout the whole structure, eliminating the potential for mold or mildew growth. Traditional mud pan installations vary significantly from insulation to installation. Our time-saving system provides a consistent, waterproof installation with prices comparable to the traditional method.

Q: Is it difficult to install the glass block and Ready-4-Tile™ shower pan?

A: With our modular shower system, the glass block installation is done in sections, offering a professional fit and finish, and a significant time savings over building block by block. Our Ready-4-Tile™ shower pan installs in a fraction of the time of a traditional mud-set pan. For more information, ask about installation brochures or DVDs.

Q: What is the warranty on the Ready-4-Tile™ materials?

A: Ready-4-Tile™ Pans are protected by a 5 year limited "no-rotteness" product warranty from the manufacturer, if properly installed following the manufacturer's recommendations.

Q: Can I use any silicone or grout with this system?

A: No. Every panel we make, supply or install is a system of products designed, tested, and proven to work together. Using off the shelf materials is not recommended and may void any warranty.

Q: I am not interested in doing the installation myself. Do you offer installation services?

A: We offer local installation of glass block windows, panels, and shower walls. Our experienced installation crews can install most panels in a day. You can feel confident knowing your panel has been installed by a company with over 25 years of experience in the glass block industry. A list of independent local contractors who have been certified in installing the Ready-4-Tile™ materials can be supplied upon request.
